

SLIVER CARE

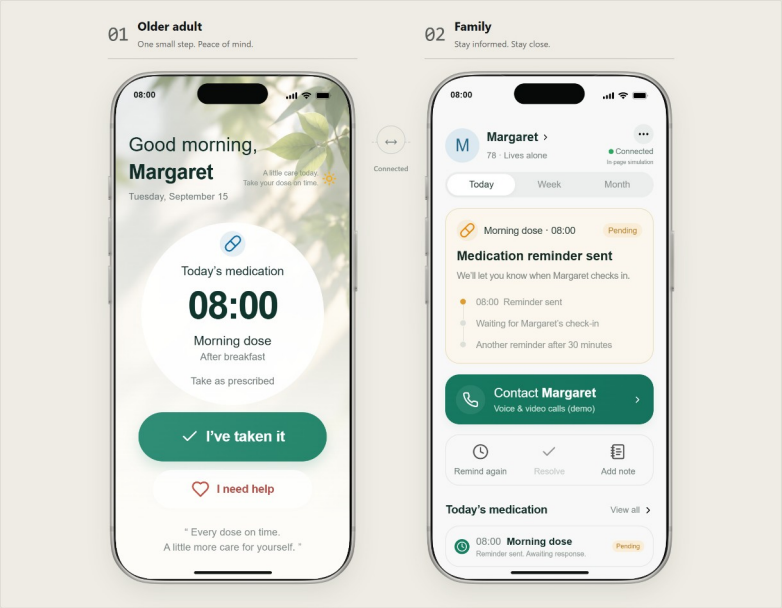

Family care after the reminder

For adult children coordinating a parent's care

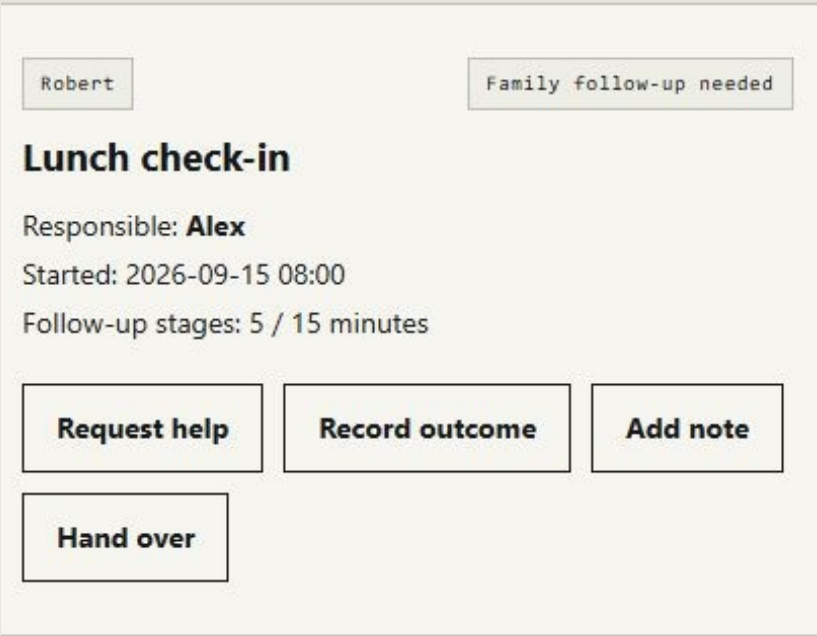

Working local MVP • Initial customer feedback

Problem, prototype and MVP

Who follows up — and what happened?

Earlier retained prototype

Saved care records and outcomes

12 functional experiments + 15 additional local checks; no independent user task test

Feedback and commitment

Selected chat evidence

¥39/month: conditional acceptance

I think the price could be acceptable if the system works reliably and my family actually uses it regularly.

If it only provides simple reminders, I might feel that RMB 39 is a little expensive.

**Clear responsibility matters.
Shared updates and alerts requested.**

No purchase or agreed pilot

Consultations show initial reactions; the screenshots are selected examples.

A care outcome, recorded and exported

LIVE

Margaret + Alex

Fictional family scenario

01 Start a reminder and request help

02 Save Alex's follow-up outcome

03 Export the same saved record

Simulated Plus enabled before the talk • Actual charge ¥0 • No real notifications

What works today

A named person. A saved outcome.

Plus: proposed ¥39 per family / month

Today's local evaluation is free.

Shared accounts, sync and remote notifications remain unbuilt.

STOP

Team time and future resource commitments

Ongoing development, maintenance and support need sustained capacity.

- 01–30** Organise feedback and archive the project.
- 31–60** Complete our review and record unresolved questions.
- 61–90** Remain stopped; no development or launch promises.

Proposed closure plan starts after the course • Thank you

Proposed family plans

Plan	Monthly / RMB	Annual total / RMB
Free	0	0
Plus	39	390
Pro 5x	79	790
Pro 20x	99	990

Pro adds rota, backups and handovers. 20x adds allowance, not care features.

Annual totals upfront • Local evaluation ¥0 • Costs and paid demand unvalidated

Evidence and boundaries

Consultations	8 people; selected chat excerpts; no completed trial recorded
Organisation outreach	10 invitations; no replies reported by 22 September 2026
Local checks	12 experiments + 15 checks; product behaviour in controlled scenarios
Stop decision	Team time and future resources; no promised reopening
